

With over 13 years of IT experience we are proud of our reputation for providing innovative, cost-effective network support and services. Our aptitude and comprehensive experience means we can design, install, support, maintain and protect IT networks for companies across London and the Home Counties.

As a growing company we are looking to further develop our portfolio of customers within London and the Home Counties by providing specialist solutions, network support services and consultancy.

TREAD*networks* places itself at the vanguard of the market in terms of customer service and cost.

We have a zeal for Information Technology that works specifically for your business no matter how small.

We provide a consistent level of high quality service to your business by designing, installing and maintaining the integrity of your IT network. Our fervour for constant improvement is in direct comparison with our aim to earn the trust of, and develop long term relationships with our clients.

We take the time to fully understand your IT systems, your business and its processes as well as your exact requirements, in order to obtain maximum uptime and performance from your IT network.

Professional, skilled, highly motivated and extremely experienced individuals are at the core of TREAD*networks* mission to serve you.
